

# MIRROR DEMISTER

**GENERATION4™**  
**FLOOR HEATING**

## SPECIFICATIONS

300x300mm - 18Watt - 12V  
400x400mm - 30Watt - 12V  
600x400mm - 45Watt - 12V & 230V  
600x600mm - 55Watt - 12V & 230V

Element: Double insulated, self regulating heating element laminated between 2 layers of polyester re-inforced self-adhesive aluminium foil.

## WARRANTY

The Speedheat mirror demister carries a one year warranty from date of purchase against manufacturing defects, conditional to it's intended use. Misuse or abuse renders the warranty null and void. Proof of payment serves as your warranty certificate.

## DISCLAIMER

No claims for damage, inconvenience or other losses resulting from the use of the mat will be entertained. The warranty is limited to the replacement of the mat itself.

## USE AND APPLICATION

The Speedheat mirror demister is intended to provide heat which conducts through to the mirror, warming the mirror surface and preventing condensation.

## INSTALLATION GUIDELINES

Place the mirror on a flat firm surface with the reflective side down and de-grease if necessary with a suitable cleaning agent such as cleaning spirits and allow to dry.

Take the demister out of it's protective packaging and carefully peel the protective layer from the self-adhesive foil.

Place the mirror demister with it's self adhesive side in the desired position against the back of the mirror and press and rub the entire area with a soft cloth until the unit is firmly attached to the mirror.

Electrical connections: The 12V mirror demister must be connected through a 12V safety transformer. The 230V mirror demister must be connected to a RCD circuit.

The mirror demister may be fitted anywhere in the bathroom area.
